ABSTRACT

Title:- Tale Galaxy

This project is an AI-powered storytelling app designed to make reading both fun and educational for children. It creates fresh, unique stories every time, tailored to themes like animals, magic, or space adventures, ensuring kids never run out of exciting content. Using advanced text-to-speech (TTS) technology, the app narrates stories in natural, child-friendly voices, making the experience feel like listening to an audiobook but with original AI-generated content. To encourage active participation, children are invited to read sections of the story aloud, while AI-powered speech recognition listens carefully and checks pronunciation accuracy, providing gentle real-time feedback to help improve fluency and clarity. Learning is gamified through stars, badges, and points, motivating kids to practice and unlock bonus stories, achievements, and rewards. Parents can track their child's progress through a dashboard that shows reading scores, milestones, and improvements over time. Unlike existing apps that focus only on narration or pronunciation, this app combines AI story generation, natural narration, pronunciation scoring, and gamified learning into one engaging platform, transforming reading into a fun, interactive, and confidence-building adventure.

Batch Registration Form

Title: Tale Galaxy

Domain: App Development

Technology Used:

Frontend : React / React Native / Flutter

Backend: Python (FastAPI/Flask) or Node.js

Database: Firebase (Free Tier)

Batch No: 13

Batch Details:

S. No.	Name of the Student	Roll Number	Signature
1	M.Tejaswi	22AG1A05G5	
2	K.Rakesh	22AG1A05F9	
3	K.Radhika	22AG1A05F6	

Ms. Shubhangi Mahule	**V Chandra Sekhar Reddy**	**V Chandra Sekhar Reddy**	**Dr. Ch. Vijaya Kumar**
Associate Professor	**Associate Professor**	**Associate Professor**	**Professor & HoD, CSE**
